

What is Coronavirus and How to Cope with This Dangerous Virus: A Simple Explanation

About the Author: Donald L. Fine, Ph.D.

Donald Fine received his doctorate in Microbiology (with specialty in animal viruses) from Pennsylvania State University in 1968. He subsequently moved to Frederick, Maryland where he began a life-long career as a scientific investigator and program director for biological research missions funded by the United States government. In particular research programs which focused upon: the etiology and epidemiology of animal viruses, testing of potential anti-cancer and anti-HIV drug candidates, analytical and immunological test development and manufacture of vaccine candidates for treatment of infectious disease, and administration of regulations covering biological safety and compassionate testing of experimental biologics for human use in treating cancer and infectious diseases. Currently, Dr. Fine serves as an adjunct professor at Frederick Community College where he tutors students in biological sciences.

Dr. Fine joined Trinity United Methodist Church (TUMC) in 1970 and currently serves as co-chair Church Council at Trinity United Methodist Church.
